

## Upcoming Book

### Description

- This book describes the remarkable discovery of a frozen human body melting out of a glacier in northern British Columbia and the cultural and scientific research that led to the understanding of Kwäday Dän Ts'ınchi, including the identification of living relatives.
- Designed for introductory university level audiences and the general public, this book documents what has been learned from more than two dozen research projects associated with Kwäday Dän Ts'ınchi.

### Chapter Contributions

James H. Dickson and Petra Mudie:

“In the Footsteps of Kwäday Dän Ts'ınchi – a Botanical Journey”

Petra Mudie, James H. Dickson and Richard Hebda:

“Environmental Scanning Electron Microscopy - a Modern Tool for Unlocking Ancient Secrets about the Last Journey of Kwäday Dän Ts'ınchi”

Richard Hebda, James H. Dickson and Petra Mudie:

“Forensic Botany of Kwäday Dän Ts'ınchi's Ground Squirrel Robe”
